

INTERIOR & **EXTERIOR** COATINGS RANGE

2009 Distributor Product Guide

Stains and Patines

Sayerlack have developed the First fully functional Stain Match System, using X-Rite Spectrophotometer technology to match stains onto any substrate, in both Water and Solvent based systems. Sayerlack have a unique range of dye and pigmented stains, with excellence in clarity and lightfastness, onto all timber types.

Water Based Pigmented Range

A comprehensive product range exhibiting a quality of finish to match top grade solvent based systems.

Water Based Clear Range

The finest range of basecoats, topcoats and coat on coat lacquers giving superior quality, and with the benefit of FIRA 6250 severe rating.

Cellulose & Pre-Cat Range

Clear and pigmented products, for traditional finishing methods. Emphasis on quality puts Sayerlack Pre-Cat finishes at the top for ease of use, coverage with colours and gives manufacturing to a very high standard.

Acid-Catalyst Range

Products led by exceptionally good pigmented system. A newly developed range for use with the Corob system; a technical breakthrough in wood finishing and with 3 clear lacquer ranges to suit all customer requirements.

Polyurethane Range

Arch introduced these materials into the UK to bring higher standards of speed and quality with results better than anyone believed possible. We are still continuously improving our range, to keep us at the forefront of the Wood Finishing Industry.

Fire Retardants

Leaders in this market with a very high aesthetic standard of finish, coupled with the unique feature of being able to upgrade the fire rating of panels.

Polyester Range

A range of products, including traditional 'wax' polyesters, polyester basecoats and direct gloss topcoats, in both clear and pigmented systems. Typically used when a high gloss 'piano' finish is required.

Acrylic Range

The ultimate in two pack Water White clear systems, easy to use and giving non yellowing properties for use over light timbers (Ash, Maple, Sycamore, Beech) and painted finishes. Available in Dead Matt and up to High Gloss!

Flooring Range

For both factory and on site use, Arch has the answer to your customers needs. We can supply all types of basecoats and lacquers, in water & solvent based ranges.

Joinery Range

Combination of Established Anglo-Dutch Quality, and now with Italian Renowned Quality of Finish and Usability.

CPS-COROB Mixing Systems

One of the most advanced Colour Mixing Systems currently available, combined with Industry leading Pigments and Bases, to produce the Finest Quality Painted Finishes.

Specialised Coating Systems

Sayerlack are known throughout the Wood Coatings Industry as having the most advanced range of products for all applications, and with the encouragement of our parent company Arch Chemicals, Sayerlack are continuing to invest in development of tomorrow's products for use today!

STAINS AND PATINES
